Business Challenges

Lack of visibility into oil well operations

Delay in processes and business decisions due to disparate systems

No unified view of task and process information

Cherrywork Intelligent Task Management

Solutions

- Development of **Integrated Operations Platform** for visibility into oil well operations
- A unified workspace to manage operations, gain real-time visibility into tasks, and track assets accurately on a secure multi-cloud infrastructure
- Smart planning functionality to schedule tasks from multiple source systems and sort them based on priority for data-driven decision making

Outcomes

- **60%** reduction in process cycle time
- **15%** increase in operational efficiency
- **Task Harmonization** by integrating **15+** business processes
- **<1 year** time span to realize return on investments
- **Improved collaboration** between field operators and command center team
- **Real-time access** to information and tasks from multiple systems
