## Business Challenge

Lack of visibility into oil well operations

Delay in processes and business decisions due to disparate systems

Lack of collated and unified view of work information

## Cherrywork Intelligent Task Management

### Solution

- Development of “Integrated Operation Platform” for visibility into oil well operations
- A unified workspace to manage operations, gain real-time visibility into tasks, and track assets accurately on a secure multi-cloud infrastructure
- Smart planning functionality to schedule tasks from multiple source system and sort them based on priority for data driven decision making

### Outcome

- **60%** reduction in process cycle time
- **15%** increase in operational efficiency
- **Task Harmonization** by integrating 15+ business processes
- **<1** year time span to realize return on investments
- **Improved collaboration** between field operators and command centre team
- **Real-time access** to information and tasks from multiple systems
