## Solution

IWM helps individuals or teams organize, track, and prioritize their work tasks and projects with built-in SAP and Non- SAP system integrations.

## How IWM transforms your organisation

### #WorkGetsDone

IWM is a work and task management tool that begins by seamlessly integrating with your organization's systems and importing your business partners such as employees, vendors, and suppliers.

Once integrated, IWM focuses on **improving process automation** by using **chatbots**, insights to action, and customized workflows.

Following task automation, IWM helps improve strategic and operational efficiency through process automation using **predictive analysis**, **configurable dashboards**, and **workflow visualization**.

## Benefits

- Automate existing processes & get quicker TAT by 40%
- Increase in productivity of workforce by atleast 10% to 20%
- Cross functional collaboration made simple
- Improved organizational quality and consistency
- Business Intelligence to help with organizational strategy
