Solution

A cloud-based solution that seamlessly integrates with backend SAP and Non-SAP systems to help make insight-driven pricing decisions.

How Cherrywork Intelligent Price Management transforms your organization

#WorkGetsDone

The Cherrywork Intelligent Price Management is a cloud-based solution that helps manage your pricing challenges from deal management to price administration, execution, and analytics with greater ease and reliability. It is a single platform to manage both buy & sell side prices using advanced machine learning models to propose product prices.

Benefits

- Real-time price definition with price Insights
- Pricing simulation to model the impact of various pricing scenarios
- Price optimization with recommendation
- Price report to make the best decision possible
- Improves price determination efficiency
- Higher user and process productivity through end-to-end price determination & recommendation
- 100% transparency & compliance to pricing policies
