Smart Order Overview

1. A solution capable of automating the process of digitally converting Purchase Orders (POs) to Sales Orders (SOs) using advanced OCR technology
2. It enables customer service teams to improve turnaround time by removing some of the redundant/manual tasks
3. It enables validation and correction of submitted requests avoiding manual follow-up
4. It comes with rule-based automatic order release management
5. It includes an Exception handling workbench

Benefits

>40% Time and cost saving

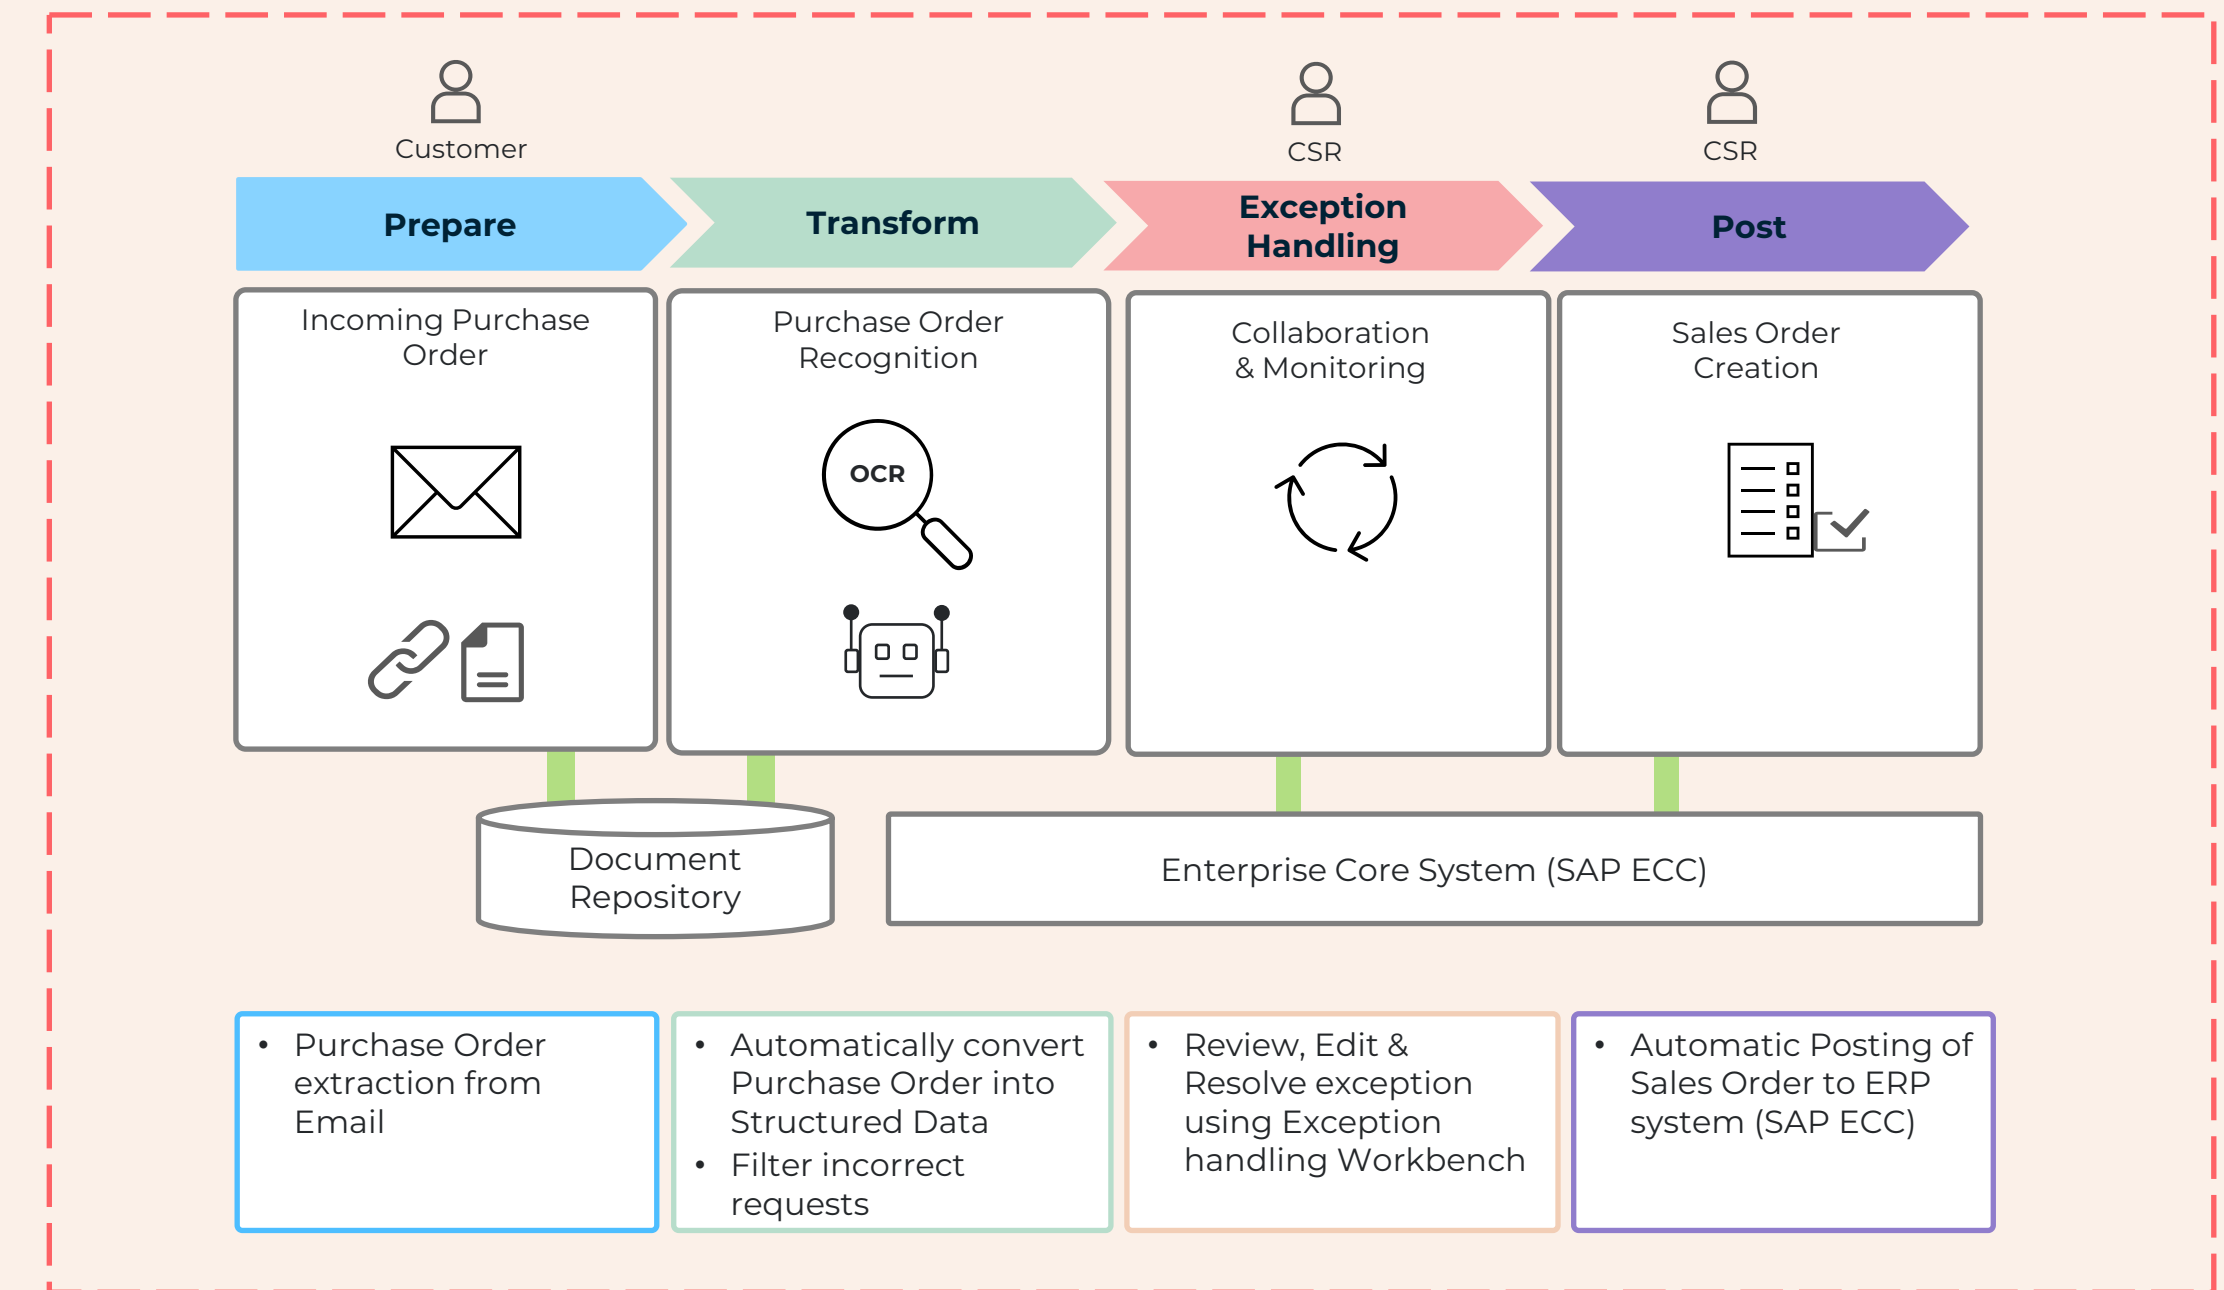

Reduce manual effort and streamline the process sales order creation

>60% Process Automation

Manage simultaneous processing and readiness during periods of growth

~70% Reduction in manual effort

This automation helps to reduce manual effort

Automatic Sales Order Creation (using OCR)
